EDUCATION & FOCUS

Bachelor of Information Management

Prime College

Nearly 5 years of hands-on experience building production web applications, with growing focus on full-stack development using Node.js.

SUMMARY

Frontend engineer based in Kathmandu with nearly five years of experience building web applications using React and Angular. Currently a Frontend Software Engineer at Novelty Technology LLC, building and maintaining client-facing applications across a range of industries. Experienced in API integration, performance optimization, and close collaboration with designers and backend engineers. Recently expanding backend knowledge with Node.js while building personal projects in Next.js and TypeScript.

EXPERIENCE

Software Engineer – **Novelty Technology LLC** Nov 2021 - Present

Built and maintained client-facing web applications using React and Angular, delivering scalable, responsive interfaces from initial development through ongoing enhancements. Collaborated closely with designers, backend engineers, and stakeholders to ship high-quality features while improving performance, maintainability, and overall user experience.

Web Developer – **PrismaSofts Pvt. Ltd.** May 2021 - Nov 2021

Developed and enhanced web applications by building intuitive user interfaces, implementing backend functionality, and delivering features that balanced user needs with business requirements. Worked closely with a small, agile team to ship high-quality software and continuously improve the product.

Frontend Developer – **Next Nepal Pvt. Ltd.** Feb 2021 - Apr 2021

Maintained web applications using Angular, building responsive and user-centric interfaces. Partnered with cross-functional teams to deliver high-quality features and contributed to the design process through Figma, assisting with UI designs and maintaining consistency between design and implementation.

PROJECTS

Elevated Care Narrative – drsonysherpa.com.np

A modern digital presence for a medical professional, showcasing qualifications, specialties, and clinical experience.

Kathmandu Studio – kathmandustudio.com

Initial prototype for a creative studio and digital marketing company, translating early concepts into a web experience before the product underwent a complete UI/UX redesign for the current production site.

Aura Store

Inventory management solution, streamlining product management, inventory tracking, and operational workflows.
